

BASED MARKET LAB

How the product works

Company-first market research · optional AI · unlock with USDC on Base

Product walkthrough · closed product · payments on Base mainnet

What it is

BasedMarketLab turns a stock ticker into a clear company research report — what the business does, strengths, risks, and longer-term story — then unlocks the full package for \$0.10 USDC on Base.

Company first

Business, health, opportunity, and watch-outs — not a day-trading terminal.

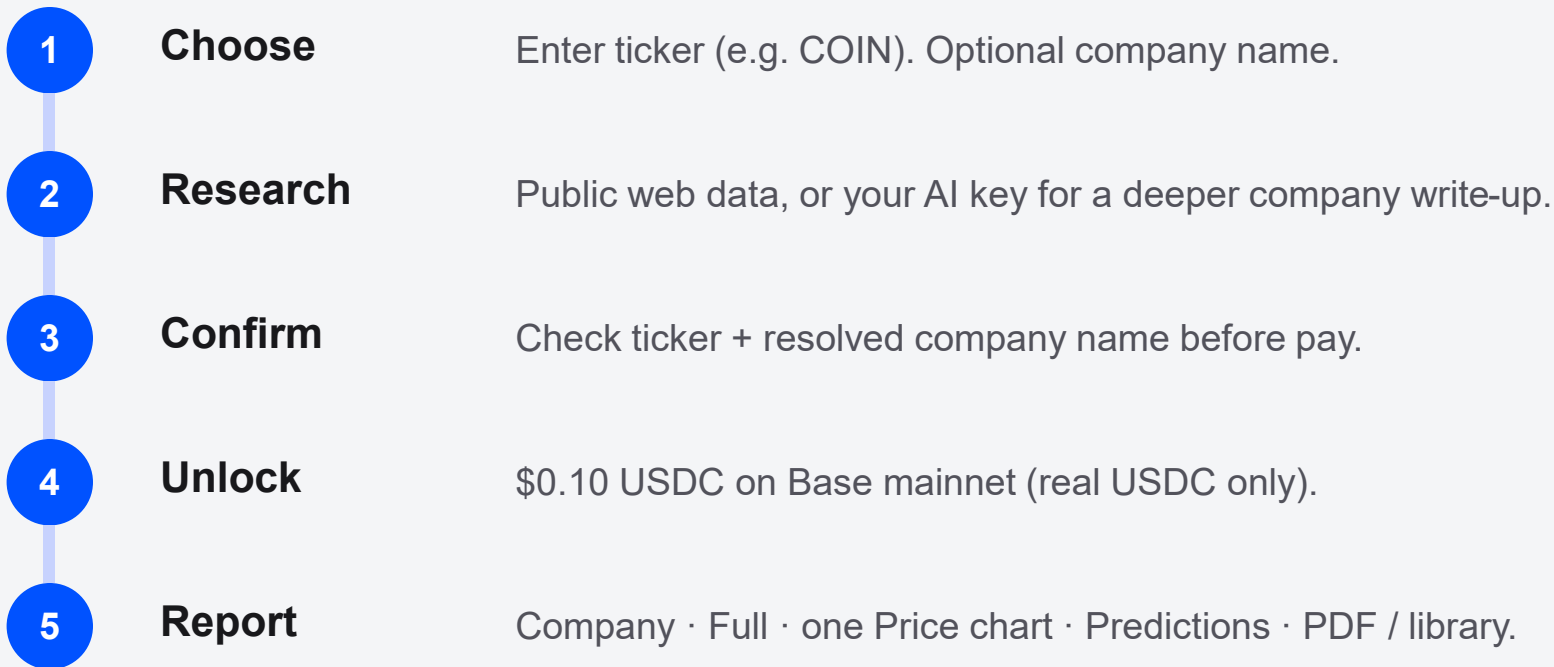

Charts as context

Price marks and structure live on a secondary tab. They support the story.

Built on Base

Pay \$0.10 USDC on Base mainnet. Wallet connect · real on-chain unlock.

End-to-end user journey

Two ways to build research

PUBLIC WEB (no AI key)

Default path

- Public market feeds + company context
- One full-history chart still builds
- Honest warning: company text can be thinner
- User confirms “I understand” before generate
- No AI key required for this path

YOUR AI KEY (optional)

Deeper company story

- Gemini, Groq, OpenRouter, OpenAI, ...
- Key stays on the user's device
- Company products, risks, multi-year case
- If AI fails / quota: falls back to public web
- Same report layout either way

Step 1 — Choose a company

Ticker · optional AI key · Generate · \$0.10 USDC

1 Choose a company

Enter a stock ticker. We'll focus on the **company** — business, strengths, risks, and longer-term story. Share price / charts are only extra context.

Two ways to build: start with **public company + market data** (no key needed), or add a free AI key for a deeper company write-up.

Ticker

E.G. COIN

Company name (optional)

▼ AI key · optional (for deeper company text)

No key required. Without a key you still get public market data, chart marks, and structure. Add a key if you want richer AI-written company research. Supported: Gemini, OpenAI, Anthropic, xAI, Groq, OpenRouter (free models auto-tried first — no model picker).

Want a free key? Gemini is the easiest start

Get a free key in a few minutes, paste it below, and save it on this device.

[How to get a free key](#)

Your key stays on this device only — we don't store it on our servers.

Choose how to build company research

No AI key

Public web · company text may be vague · charts still work

Add an AI key

Deeper company research from your key

No AI key — public web path. Company info may be vague or incomplete; charts still run. Add a key above for a richer company write-up.

Generate report

\$0.50 USDC on Base

Step 2 — Confirm company & unlock

Confirm company

User must tick YES on ticker + resolved name (e.g. COIN → Coinbase Global).

Connect wallet

MetaMask / Coinbase Wallet on Base mainnet (chain 8453).

Pay \$0.10 USDC

Real USDC transfer to your shop address. App verifies the tx on Base, then unlocks.

No free skip

Testnet and free unlock are off — production path is mainnet USDC only.

Unlock UI — wallet checkout

Confirm company → connect MetaMask / Coinbase Wallet → pay \$0.10 USDC on Base

BasedMarketLab
Market research on Base

Built on Base

COMPANY

Coinbase Global, Inc.

YES
This ticker and company are correct. I'm ready to pay.

Local test unlock is on. Payment is skipped for local testing only.

Unlock without payment (local test only)

Unlock your report
Testnet: Connect MetaMask on Base Sepolia. Pay opens MetaMask — you must approve. Need Circle TEST USDC + free Sepolia ETH for gas (not real money).
\$0.50 USDC · Base Sepolia (testnet · free test coins)
Base Sepolia (testnet · free test coins) Local free unlock awaiting payment
No wallet found on this browser. Press **Free setup guide** to install one (MetaMask recommended for free test coins). Many wallets work: MetaMask, Coinbase Wallet, Brave, Rabby, Trust, OKX, and more.
NEED A WALLET OR FREE TEST COINS?
Wallet + faucet guide
STEP 1
Connect wallet
STEP 2
Pay \$0.50 test USDC · Base Sepolia
Install Coinbase Wallet or MetaMask, refresh, then press Connect wallet.

What the buyer gets

Company

Bottom line, business, strong / weak, watch-outs, market phase, word guide.

Full company report

Numbered sections: glance → what they do → opportunity → how business is doing → risks → put-together.

Price chart

One full-history chart with buy/sell marks — secondary context, not the main product.

Prediction markets

Side context cards (company / macro-style questions).

PDF & library

Download PDF; re-open saved reports anytime from Your reports.

Sample report — Company tab

Bottom line · business · strengths / watch-outs · market phase

API path (AI-shaped research)

COIN · report preview

Generated for screenshot audit (payment bypassed)

Simple · bottom line

Coinbase Global, Inc.: the business looks mixed; the longer-term story is decent; calls for a careful research stance.

quality MIXED

opportunity 72

stance careful

Business

Coinbase operates a major US crypto marketplace: retail and institutional trading, custody including for spot Bitcoin ETFs, subscription pr

Opportunity

If crypto becomes a lasting part of mainstream finance, Coinbase can win as a trusted US on-ramp: regulated exchange, ETF custody, USD Coir

Watch-outs

A multi-year crypto winter would crush fee revenue.

Adverse regulation could shrink product scope.

Loss of major ETF custody clients would hurt the franchise.

Full report sections

1. The company at a glance

Coinbase Global, Inc. (COIN)

Coinbase: US crypto platform with institutional rails.

What they do: Coinbase operates a major US crypto marketplace: retail and institutional trading, custody including for spot Bitcoin ETFs, subscription products, and developer tooling.

Business health: mixed. How careful to be: careful.

Price chart — context only

Supports the company story — not a day-trading terminal

Free example — fictional company, same layout as a real report.

Company

Price chart

Prediction markets

Five grades: strong buy - weak buy - mixed - weak sell - strong sell. STRONG must pass the money line (after costs) or is demoted. Price targets stay long-side. Hover for facts. Use 1Y / 6M to zoom.

Strong buy

Weak buy

Mixed

Weak sell

Strong sell

Chart

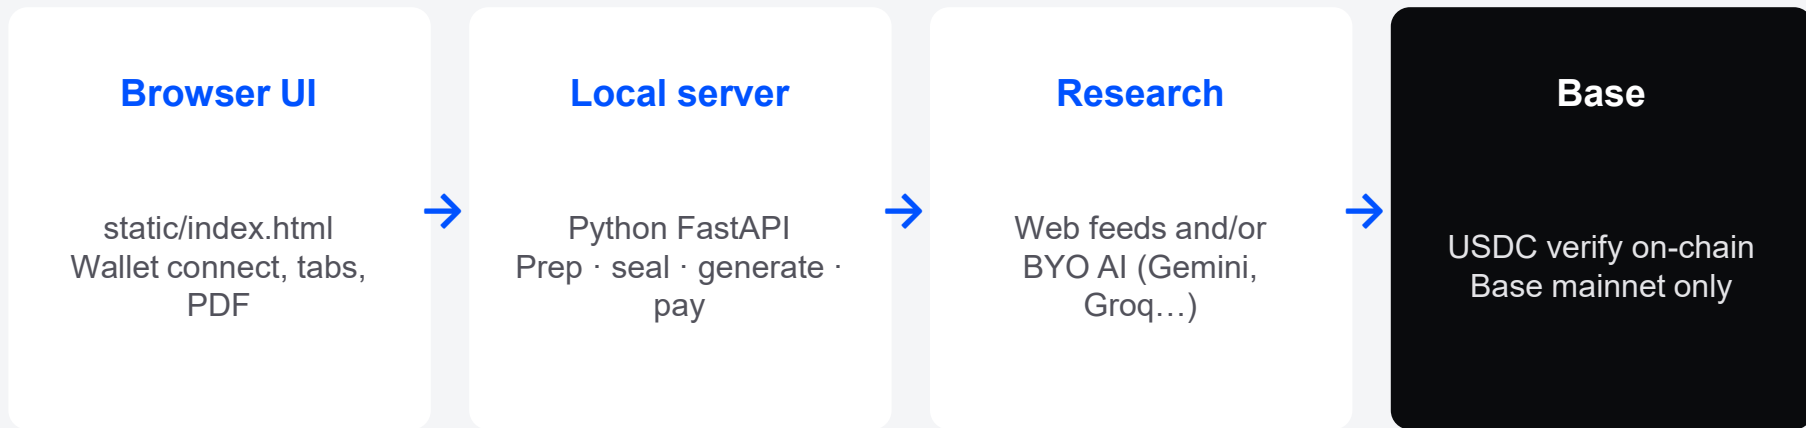

Quiet

Swing term (about 5 weeks): there is an older Weak sell cue from about 115 days ago (2026-03-24), but it is outside the active window for this timeframe (only the last ~35 days count as current). For the next several weeks, treat that mark as history, not an active setup.

As at 17 Jul 2026

Under the hood

Key design choices

AI keys stay with the user · Research prompts stay on the server · \$0.10 USDC verified on Base mainnet before unlock · Product source stays private (closed) · GitHub site is presentations only.

One sentence

**BasedMarketLab is company research first,
charts second, paid in USDC on Base.**

Path: ticker → research → confirm → pay \$0.10 USDC on Base → Company / Full / Chart tabs.

Built on Base · Closed product · Public presentations only
